

PRODUCT CHANGE NOTIFICATION

Ai PCN No: 138

Date Issued: May 12, 2017
Notice Type: Product Revision Change
Product Type: DL151

Change Notification Summary

In an effort to improve our products, Advanced illumination (Ai) will update the LEDs used in the DL151 design. This change will result in a brighter, more uniform light at the same price*. Customers may still buy the current revision of this model until August 11th of 2017. After that time, orders for these products will be converted to their respective DL151 Revision A models.

This LED change will result in additional wavelengths being available. These additional wavelengths will be announced at a later date. Additionally the white LED color temperature will be changing from 6100K to 5500K.

*Pricing for the new wavelengths will be announced at the same time as the new wavelengths.

Orders for customized (dash numbers) versions of DL151 will be honored until November 10th of 2017. Ai will be actively working with customers for those products to simplify the transition.

Please contact your Ai Sales Representative if you have any questions.

Products Affected

Old PN	Last Order Date	Last Ship Date	Replacement Product
DL151XX-CCCPP	August 11, 2017	September 8, 2017	DL151XX-CCCPP, Revision A
DL151-CCCPP-XXX	November 10, 2017	December 8, 2017	DL151-CCCPP-XXX, Revision A

XX= Length, CCC = Spectral Wavelength,
