

PRODUCT CHANGE NOTIFICATION

Ai PCN No: 150

Date Issued: September 21, 2020
Notice Type: Product Change
Product Type: DCS-MP

Change Notification Summary

In an effort to improve our products, Advanced illumination (Ai) is updating the DCS-MP. This update will add a selector switch for an operator to select the appropriate control setting whether using the iCS 2 (IC) or iCS 3 (I3/I3S) driver. Compared with the previous iteration, this revision now allows connecting an iCS 2 with M12 light head.

The expected cut-in date for Rev is the end of the year, dependent on sales.

Please contact your Ai Sales Representative if you have any questions.

Products Affected

Old PN	Last Order Date	Last Ship Date	Replacement Product
DCS-MP	N/A	N/A	Same PN, but Rev A
